

## Case Study 10: Tungum in the Drass Dive Watches

One of our customers liked Tungum® so much, they decided to make a watch using Tungum® tubing!

Drass are a leading specialist company in the diving world and have used Tungum tube in their hyperbaric chamber construction for many years. Drass liked the performance value and history of Tungum so much they decided to produce some special edition Tungum watches.

Drass watches express the sense of belonging to the diving, subsea and offshore world. An environment where man and technology share the need for strength, performance and reliability. Where experience and tradition are as valued as innovation.
